## Q2. How many patients were treated for Urothelial cancer (any stage) in the past 3 months with the following treatments:

- Atezolizumab (Tecentriq)
- Avelumab (Bavencio)
- Carboplatin single agent or in any other combination

- Palliative care only

There have been less than 6 treated for Urothelial Cancer with these treatments. The data shows the number of unique patients treated with the above, as such, some of these patients may have received more than one of these drugs/treatments.

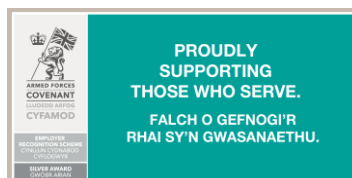

Where the figure provided is less than 6, and where simple calculations could identify fields that contain less than 6, the Trust has applied an exemption under Section 40(2) (personal data) of the Freedom of Information Act 2000. This is because the Trust believes there is a potential risk of individuals being able to be identified if the figures were disclosed.

## Q3. Does your trust participate in any ongoing clinical trials for the treatment of urothelial cancer? If so, can you please provide the name of each trial along with the number of patients taking part?

Yes, the Trust currently has - **IO102-IO103-022** – A Phase II Multi-Arm (basket) Trial Investigating the Safety and Efficacy of IO102-IO103 in Combination with Pembrolizumab, as First-line Treatment for Patients with Metastatic Non-Small Cell Lung Cancer (NSCLC), Squamous Cell Carcinoma of Head and Neck (SCCHN), or Metastatic Urothelial Bladder Cancer (mUBC). There are 8 patients in this trial.

I trust this answers your request for information, however, should you not be satisfied with the information supplied or the process of supplying it, you have a right to complain and request a review.
