We are only able to provide data for hormone therapies involving ADT alone and Docetaxel in combination with any ADT. We do not hold specific data on regimens associated with individual pharmaceutical companies

We do not have access to metastatic coding directly, so the data provided is based on patients with a diagnosis of "Hormone sensitive metastatic prostate", as recorded in our clinical systems.

For each of the following hormone therapies used to treat prostate cancer, please provide the number of patients treated at your Trust between 01 January and 31 December (by years 2023 and 2024). For each therapy, broken down the data into the following categories:

1. Total Number of Patients Treated for ICD-10 C61 / M1-M1c (metastatic).

2023	12
2024	30

2. Number of Patients for Whom Hormone Therapy Was Initiated for ICD-10 C61 / M1-M1c (metastatic).

It is not possible to distinguish whether a patient has been initiated on or is continuing hormone therapy. Therefore, the figures represent a combined total of both initiated and ongoing treatments.

2023	12
2024	30

3. Number of Patients for Whom Hormone Therapy Was Continued; ICD-10 C61 / M1-M1c (metastatic).

Please refer to response to Q2 above.

4. Number of patients for whom docetaxel was initiated for ICD-10 C61 / M1-M1c (localised & metastatic).

2023	10
2024	38
